General Description of Work to be Performed

Additional Requirements

Permit Required
Notify Dig Alert

Notice of Completion Must be
Submitted no Later than 180
Days From Pre-Approval Stamp

Type of Material To Be Used

Colors:

Builders Name:

Architectural Change Procedures

- Architectural Change Request is submitted to the office. (Prior to Installation)
- Written approval must be given before installation can commence.
- Must meet all local city and state building codes.
- Homeowner retains responsibility to maintain said Architectural Change and upkeep of their appearance in accordance with the standards set by the CC&Rs, Rules and Regulations and what is set forward by the Board of Directors. (This includes any breakage from landscape equipment)
- Upon completion of installation you must submit a NOTICE OF COMPLETION FORM with pictures of the completed project. You can email this to ach@mvhoa.org or mail them to 10540 Caminito Baywood, San Diego, CA 92126. This must be done within 48 hours. Be sure to notify management so that a final review/inspection can be done by the Association.

Homeowners Responsibility

Along with the above guidelines, it is important to remember the homeowner is responsible to maintain any changes and upkeep its appearance. The homeowner also has the responsibility to temporarily remove any part of the additions if any exterior repairs (e.g. paint or wood repair) are needed to the unit.

I, (We) the owners of the address listed above am (are) in agreement that upon the installation of said items listed above, do hereby release Mesa Village Homeowners Association from any obligation of any future damage of the said property above caused by the installation, or defect in material. I, (We) also agree that upon the sale of said property, this release will be disclosed and transferred to any future owner(s).

Water Line Replacement Guidelines

- Effort should be made to keep the pipes in the walls and not exposed.
- With prior written approval water pipes in the carport may be re-run secured to the exterior stucco wall within the carport or under the carport roof.
- Pipes must be uninsulated straight Type L copper, with a diameter no larger than 3/4".
- Pipes may run vertically and/or horizontally (not angled), at the top of the walls. Pipes must remain within the carport and cannot run around the house.
- Pipe may run under the carport door.
- Pipes must enter the structure immediately.
- Pipes must be painted to match the color of the wall.
- Pipes may need to be removed by the owner in order for maintenance to be completed. (this would be at the homeowners expense).

I understand and agree to abide by the following Procedures stated above.

SOLAR PANEL INSTALLATION GUIDELINES

Form ACRF 011624-1

1. All solar devices and panels mounted on the roof may not extend higher than or beyond the roofline.
2. No solar panels and/or such devices may be installed on an owner's property other than on the roof of their home, and may not be installed on any flat roof.
3. The highest point of a solar panel must be lower than the ridge of the roof where it is attached.
4. Solar panel shall be mounted no higher than 4" above the roofing material and in the same plane of the roof on which the solar energy system is mounted.
5. The color of the panels and trim of the support structure will be limited to black, brown, gray or non-reflective metallic as provided by the manufacturer.
6. All electrical connections will be located directly under and/or within the perimeter of the panel and invisible from all street angles as much as possible. Do not wrap the electric runs around the house; electric runs must enter the unit as soon as possible. Conduit runs need to be illustrated on the submitted plans.
7. Pictures submitted indicating exactly where each device/boxes, batteries will be installed (*IE. Main Panel, Sub-Panels, Load Center, All Meters, Inverters, AC/DC Disconnects, Combiner Box, and other items that will be visible pertaining to the solar installation.*)
8. All electric runs or devices must be painted to conform to the surroundings around it.
9. All roof mounted solar energy systems shall be an integral part of the roof and have the appearance that they are serving the structure, and should maintain the aesthetic nature of the existing structure.
10. A cover plate or the glazing for solar energy systems should be either transparent or consistent with the character of the structure.
11. Inverters can only be installed on top of the roof or in the exclusive use areas of that unit. Inverter can also be installed in the utility room as long as it is attached to the wall of your unit and remain out of sight from the common area.
12. All solar panels must receive architectural approval of the Association prior to installation, pursuant to the Conditions, Covenants, and Restrictions of and for the Association and any and all application procedures currently in effect.
13. Once the pre-approval has been granted by the Association and the work has been completed, a copy of the city permit final approval must be given to the Association before final approval by the Association can be granted.
14. A "critter guard" constructed of metal is required.
15. A Notice of Completion form with pictures must be submitted within 48 Hours from Completion.

I understand and agree to abide by the following guidelines stated above.
